01 FC:204 135.00 CH

IN THE CLAIMS:

Please **amend** claim 33. All pending claims are reproduced for convenient reference.

33. (Amended) A device for positioning a filament in a body lumen having lumen walls, said device comprising:  
a catheter which can be introduced into the body lumen through a first access penetration in the lumen wall; and  
means advancable from the catheter for creating a second access penetration in the lumen wall and providing a filament path between said first and second access penetrations.

34. (As filed) A device as in claim 33, wherein the catheter has at least one lumen therethrough and the advancable means is reciprocatably received in the catheter lumen.
